

Report of the parallel session

Time-Domain Science

JP: Masahiro Takada (Kavli IPMU),
Jian Jiang, Masaki Yamaguchi (U. Tokyo),
Yuu Niino, Masaomi Tanaka (NAOJ)

AU: Jeff Cooke (Swinburne)

CA:

CN:

KR:

TW:

<<Discussion items>>

1. Collaboration

***Define some model cases of collaborations (both science and instrumentation)**

*How do we organize medium-to-large class programs other than SSPs?
Or do we just follow the current open-use scheme?

2. Feedback to Subaru

***Feedback to Subaru instrumentation and operation from scientific perspectives?**

*How do we deal with ToO programs?

3. Promotion of partnership

*Improve awareness of the Subaru partnership in the communities

***Launch science/instrumentation working group in each category for further discussion/contact/mini-workshop?**

1. Collaboration

***Define some model cases of collaborations (both science and instrumentation)**

*How do we organize medium-to-large class programs other than SSPs?
Or do we just follow the current open-use scheme?

● On-going

- HSC-SSP transient survey (JP) => Keck follow-up (AU)
- SUPERB fast radio burst (AU) => Subaru follow-up (JP)

● Near future

- Simultaneous **high-cadence** survey
with **multi-wavelength** facilities
ex: DWF (Deeper, Wider, Faster) + Subaru/HSC

Deeper, Wider, Faster + Subaru/HSC

- **JP => AU**

- Subaru/HSC

- Expertise in realtime reduction of HSC data

- 1m Kiso wide-field fast CMOS camera (0.5 sec, Tomo-e)

- **AU => JP**

- Many radio telescopes, AAOmega spectrograph

- Expertise of fast reduction, computer resources

- **Joint proposal**

* how do we count “Australian time”??

2. Feedback to Subaru

***Feedback to Subaru instrumentation and operation from scientific perspectives?**

*How do we deal with ToO programs?

- **Operation**

- Cadence observations in queue mode

- **ToO**

- **Many of “time-domain” science are not necessarily ToO-type**
- ToO: GW, nu, FRB, GRB
==> inter-partner ToO (needs collaboration)

3. Promotion of partnership

*Improve awareness of the Subaru partnership in the communities

***Launch science/instrumentation working group in each category for further discussion/contact/mini-workshop?**

- **Already exists (AU-JP)**

- On-going collaboration

- Discussion of joint proposals

- Collaboration on technical challenges

- (fast data transfer, realtime data reduction, ...)

- **CA, CN, KR, TW?**

- Please bring the outcomes of this workshop back to your countries
